

Neighbors for Road Safety

Neighbors for Road Safety is a community-based effort to improve safety on our streets by raising awareness about local safety issues, by increasing knowledge of roadway operations, and by providing neighborhoods with the tools they need to address road safety issues.

Working directly with city staff, participants can expect to:

- Learn about collision hotspots in their neighborhood and the factors that contribute crashes
- Receive monthly communications about road safety issues
- Learn more about the rules of the road including how to use new roadway features
- Learn how to improve safety in your neighborhood through engineering, enforcement, and education efforts
- Receive tips on the best ways to *Be Super Safe*

Ready to take action? Visit www.seattle.gov/besupersafe/nfrs to get involved!
